

# TECHNOLOGY EXPENSE MANAGEMENT MADE SMART

Reduce  
financial risk  
of Cloud by 40%

Up to 400% savings  
on monthly cloud  
expenses

Scalable, secure,  
customisable,  
and configurable

- **Multi-cloud:** A single platform to view your entire cloud environment across all public cloud providers and accounts.
- **Comprehensive billing and budgeting:** Interactive dashboards and reports to facilitate cloud budget and spending tracking.
- **Optimization:** Proactively identify anomalies and trends, implementing corrective measures to avoid unexpected costs.
- **Financial processes:** Proactively identify anomalies and trends, implementing corrective measures to avoid unexpected costs.

OneView® provides users with in-depth visibility and full control over their cloud journey. By deploying OneView during migration to Azure, you can accurately track your progress, view spending in real time, and manage your allocated budget, all supported by a live platform and notifications.

## Benefits

Reduce financial risk of cloud by 40%.  
Achieve up to 400% savings on monthly cloud expenses.  
Scalable, secure, customisable, and configurable.

## OneView® Product Description

OneView® is a Microsoft-certified, cloud-based cloud expense management platform. Through integration with service providers, OneView® enables automated data collection, enrichment, and verification of enterprise usage, spending, and resource allocation. OneView® also integrates with your third-party business applications to simplify the management of your multi-cloud environments.

### WHY ONEVIEW®?

- Expense and allocation management.
- Dashboards, reporting and notifications.
- Resource allocation and tagging.

# WHY OneView® A CLOUD BUSINESS CASE

## WHEN OUR CLIENT BEGAN THEIR AZURE MIGRATION JOURNEY, THEY NEEDED:

- Complete visibility of all their migrated resources and resource groups.
- Assurance that the rollout aligned with the approved migration budget and Azure cost estimator.
- Proactive monitoring of spending to enable informed decision-making.

## DURING THE MIGRATION PHASE, ONEVIEW ASSISTED THE CLIENT BY ENABLING THEM TO:

- Receive notifications as their subscriptions and resource groups were migrated to Azure, in accordance with the project plan.
- Easily track spending and report on the approved budget using interactive dashboards and reports.
- View and monitor daily expenditure and project costs on a per business area or project basis throughout the migration.

## AFTER THE MIGRATION PROCESS, THE CLIENT USED ONEVIEW ON AN ONGOING BASIS TO:

- Proactively track spending against the budget throughout the month to avoid unexpected costs.
- Easily recover cloud costs from internal business areas.
- Conduct trend analysis and forecasting.
- Detect anomalies and identify optimisation opportunities.

## ADDITIONAL BENEFITS OF USING ONEVIEW:

- Customisable spending and budget notifications.
- A single view into your multi-cloud environment.
- A scalable and secure SaaS platform.
- Various monthly licensing options to suit your cloud environment.
